I.T. For the Small Business

Let's face it: whether we embrace

This may relieve your stress, but it won't solve your computer problems.

them with open arms, or with clenched fists, computers and technology are here to stay.

While they can be intimidating and frustrating, they are valuable tools that will help your business grow, adapt and compete in today's market. As a small business, you may not have the luxury of dedicated I.T. personnel and large technology budgets that large corporations enjoy. We believe that as a small business, you deserve the same professional experience and expertise that larger businesses receive. Let us take care of your changing technology needs, so you can take care of your business, easily and more efficiently.

Experience...

We offer your business over 15 years of I.T. experience in both large corporate (over 2,000 workstations) and small business networks and I.T. needs. The owner-operator brings to your business the confidence of industry wide recognized certifications (Microsoft Certified Systems Engineer and A+ Certified Technician), and a bachelor's degree in Engineering.

Affordability...

We are available on an as needed basis, so you do not incur any overhead costs when not needed. We do not push service contracts, where you end up pre-paying for service you'll never

We'll help keep your I.T. costs from giving you a rude awakening.

use. With us, if you don't need us, you don't pay us. Our hourly rates are reasonable, and when providing hardware and software that we install, you are charged **our cost** for these items. Finally, our designs and solutions will be tailored to fit your budget.

Flexibility...

We recognize the uniqueness of your business. We do not follow a "cookie cutter" approach; we will assess your specific needs and implement solutions tailored to *your* business.

Reliability...

You are entrusting us with your business and we are receiving an honest fee. We believe that your business should be treated with the same concern as we treat our business. That is a guiding principle from which we will not deviate.
